Security Copilot in Microsoft Entra

- Security Copilot Experiences
- Entra Scenarios
- Entra Agents
- Requirements

Security Copilot in Microsoft Entra

• Security Copilot Experiences

- Standalone
 - <https://securitycopilot.microsoft.com>
- Embedded
 - In Entra Admin Portals
- Agent

• Entra Scenarios

- Entra ID
- Entra ID Protection
- Entra ID Governance
- Entra Internet Access & Private Access

• Entra Agents

- Conditional Access optimization agent
- Identity Risk Management Agent (Preview)
- Access Review agent (Preview) *
- ..others coming

Requirements (* until November 2025)

Secure Compute Unit (SCU) & Azure Subscription.

Entra Suite | Entra ID Premium | Entra ID Governance.

Security Copilot for M365 E5 Customers

Announcing

Security agents in your daily workflow

Security Copilot now included for all Microsoft 365 E5 customers

Security Copilot Agents

Agents to empower roles across security and IT

Partner-built Security Copilot agents

Build your own Security Copilot agents

LIVE DEMO – Security Copilot

- Entra Agents - Conditional Access optimization agent

MCP – Model Context Protocol

- “USB-C” standard for your AI tools
- How does it work?
- Entra Scenarios

MCP – How does it work?

Host IDE could be Visual Studio Code

Tools can be used from Microsoft 365 Copilot or Azure Foundry

Remote Service could be Microsoft Graph API

Microsoft MCP Server for Enterprise

- Entra APIs from Microsoft Graph
- Public Preview (read-only)
- No license
 - (except for the API's you explore)
- If looking for writable access, see Lokka by @Merill

<https://github.com/mcp/microsoft/EnterpriseMCP>

LIVE DEMO – Microsoft MCP Server for Enterprise

- Local IDE
- Microsoft 365 Copilot
- Azure Foundry

Agent Identities in Microsoft Entra

- Agent ID and Agent 365
- Secure Access for AI Agents
- Understand Agent Identity in Microsoft Entra

Agent ID is the foundational layer of Agent 365

Microsoft Agent 365

The control plane for agents

Zero Trust in mind

Every agent interaction follows Zero Trust principles to minimize risk and protect resources.

01

Zero standing permissions

Agents receive no permission "by default". Every access must be explicitly granted.

02

Time-bound

Agent Identities have expiry timer. When it goes to zero, Identity is disabled.

All access is granted for a defined duration, ensuring no indefinite permissions remain.

03

Restricted high-privilege access

Some high-privilege access is blocked by the platform. Cannot be granted in any way. For example, **Users.ReadWrite.All**.

04

Forced accountability

Sponsor is mandatory property* of an Agent Identity

Automate agent identity lifecycle workflows

Manage – Govern - Protect

Understand Agent Identities in Entra ID

Agent Identity Blueprint

Developer/Admin Platforms

Agent Platforms

- Authentication
- Permissions
- Security
- Lifecycle
- AgentIdentity.CreateAsManager

LIVE DEMO – Govern Access for Agent Identities

- Use Entra ID Agents Samples on GitHub to govern access for Agent Identities

Summary

Use and get insights from Security Copilot Agents like Conditional Access

Learn, Discover, Protect and Govern Agent Identities

See below GitHub repo for session materials and recorded demo videos, presentation and more.
